

UNPLEASANT WEEK
RECORDED IN DISTRICT

(Continued From Page Nine.)

moulds are on a rotary disc and when cast the copper is immersed in cold water, dumped automatically into an elevator and hoisted on to the cars, a most satisfactory plan.

CALUMET AND ARIZONA.

At the Calumet and Arizona the rounding up of the improvements at the powerhouse is progressing slowly and deliberately, since there is no occasion to rush. The leading feature in this department is the big 850 horsepower Nordberg, with its 50,000 pound flywheel, which can be put in commission within three days.

On the west side of the smelter building a horizontal steel stack, 150 feet in length, has been completed, connecting with a vertical stack of corresponding height. The foundation rods are in place for the vertical stack and concrete work will be commenced on the foundation immediately. This stack is intended to accommodate the converters of the smelter.

All five furnaces are now in full blast. One blower and engine has been added as a reserve item and the construction of two additional furnaces is under contemplation. The trolleys are up on the new slag system but it will be some time before they are in operation.

QUEEN SAMPLING WORKS

The business at the Copper Queen sampler, which fell off seriously when the copper market crashed, is gradually returning to its former healthy proportions. When the panic came the company would only accept copper (and that grudgingly) paying 75 per cent down at the time the ore was received, at the current quotations ruling at that time, and the remainder 25 per cent according to quotations at the time of final settlement and as a consequence of the downward tendency of the market, in many instances, that 25 per cent was a small quantity when the time for settlement arrived. Now, the rule has been rescinded and the ore is bought on the old plan, according to current quotations, and in view of the upward tendency of the market the company feels that it is amply protected.

Eight blast furnaces are in commission at the Queen, besides the reverberatory furnace.

IN SONORA

A car of ore recently brought in from the Lucky Tiger, it is stated by a gentleman who knows, averaged seven ounces of gold and 400 ounces of silver to the ton.

John Gaughran, who arrived from the Nacozari Consolidated Copper company's property a few days ago, brought up a splendid specimen of native copper taken from the new tunnel under the Copper King shaft. This is the point from which President Alexander calculates to catch up with the extension of the big places ore body. Mr. Gaughran returned to the Nacozari Consolidated Monday and President Alexander followed on Thursday.

MINING NOTES AND PERSONALS
Frank Wright, lessee on the Virginia, came up Wednesday and stated that just as he and his partner had

cleared away for work the wind demolished their tent and turned them loose in the foothills. He immediately outfit and returned to the scene of his operations.

Al Brockman was in this week from the field of his investigations about sixty miles east of Douglas on the international boundary. Al is also extensively interested in the Paradise country, where he has important holdings.

"Young Grif," as he is familiarly known and who is a son of our former United States marshal and penitentiary warden, W. H. Griffith, came up from the Tribolet ranch last Thursday and returned yesterday. He has the Tribolet ranch leased and is making slightly in mining out a short distance from Fronteras.

Major Collins, formerly a foreman at the big Greene mine at Cananea, has just returned from the east and predicts an early resumption of work in Cananea.

Dr. Brandon of Gold Treasure fame went through to El Paso yesterday for a short stay. The doctor states that an important decision is daily expected in connection with the Brandon, Swallow, Jones, et al. contention over the Gold Treasure, in the San Jose mountains, known officially as the A. M. and D. company.

Herman Berkhout went south yesterday on the Nacozari train to resume general exploration and development work in his favorite district out from Nacozari.

Consulting Engineer Heffern of the Nacozari Consolidated Copper company went to the Swisheim district yesterday on business connected with his numerous interests there.

Parties up from the heart of the Moctezuma district yesterday stated that there was a perceptible increase in activity in relation to Southern Pacific construction work, and a general resumption is expected as soon as the Del Rio and Nogales branch shall have been completed.

CLIFTON-MORENCI DISTRICT

(Clifton Copper Era)
E. Depee, who is a partner to Dick Marshall, reports that he is taking out some excellent silver ore from the Harper claim, situated near Morenci. He will continue to place the ore on the dump preparatory to making shipments to the smelter. Mr. Depee is of the opinion that he has enough shipping ore in sight to insure flattering returns.

The Arizona Copper company output for January reached the excellent mark of 1441 tons of Bessemer copper, which is not bad for a starter. When it is considered that this excellent showing is being made by the smelter greatly in need of repairs, the A. C. company will make a most gratifying showing upon the completion of its present plans in the way of repairs. Several new converters and a number of converter tops arrived this week from the El Paso Foundry and Machine company, which will be a valuable addition to the smelting department.

C. D. Cameron was down from Met-

cal last week. He is doing some work on the Celtic group of mining claims and reports that a new strike has recently been made. The ore is of high grade sulphide, averaging 38 per cent copper, and carrying some gold and silver. The Celtic group is one of the old time properties of the district and wears a good name among all prospectors who are acquainted with it. The new strike was made in a drift from the main shaft and promises to be of considerable extent. Water has been encountered in the shaft, which is the only drawback at present. The installation of a small pumping plant will be of much value to the rapid development of the property.

The Shannon output for last month amounted to 700 tons of Bessemer copper, which compares favorably with the usual average. At this rate the Shannon will easily produce about 17,000,000 pounds of copper during the present year. But this is not by any means an accurate estimate, as the company is in position to easily produce half as much more. The work is now being done with one furnace and the two smaller ones, which have recently been repaired, are being held in reserve. At the present price of copper there is no special reason why the Shannon should use its ores at a small profit. Should the price advance to a more reasonable figure the company no doubt will increase its output materially.

At the recent meeting of the stockholders of the Polaris Mining and Milling company the following officers were elected for the ensuing year: Sam Abram, president; D. W. P. Elyar, secretary; E. J. Lehmann, treasurer; Nick Cole, George Chrispin, Ira Harper and L. F. Sweeting, directors. The meeting was an interesting one and considerable business was transacted. The Polaris company was organized in this district a number of years ago for the purpose of developing some valuable mineral claims above Clifton. The claims represent some of the best gold property in the district, but so far enough work has not been done to illustrate its value. The Southwestern Development and Reduction company was recently organized to finance the property with the result that a large amount of development work is now being done. In the Polaris property many local people are interested, and no doubt the time is near when they will be glad of their investment.

NEW SMELTER RUNNING.

(Tombstone Prospector.)
The new smelting plant of the Southern Arizona Smelting company, at Saco, about 35 miles west of Tucson, on the Southern Pacific railroad, was blown in Saturday evening and is running satisfactorily to the management. It is a thoroughly equipped plant, having at present a daily capacity of 350 tons, but another of equal size is already ordered and will be added very soon. The smelter was built primarily for the reduction of the ores of the Imperial mine, twelve miles south of the smelter, but later will handle custom ores, and may treat the ores from the Tombstone Consolidated Mines company, which is the property of the same company.

DON'T
RISK

The chance of being swept financially out of existence by neglecting the matter of fire insurance.

It is a short-sighted policy. When well insured, you feel the solid rock beneath your feet. The ringing of the fire-bell does not give you nervous prostration and you can go to sleep at night feeling that the touch of a match can not spell your ruin.

I would be glad to show you some figures on insurance. Possibly you have wrong ideas on the subject of rates.

I represent a splendid line of companies.

LINDLEY-GREENE WEDDING

NEW YORK, Feb. 8.—A large and fashionable wedding today was that of Miss Edith Greene, daughter of General Francis Vinton Greene of New York and Buffalo, and Charles A. Lindley of this city. The ceremony was performed this afternoon in Grace church and was followed by a large reception.

QUINCY MOVES TOWARD
OTHER MINE TRACTS

(Continued From Page Nine.)

horse power three-phase induction motor and a street car controller.

The current will come from the Winona's electric station, equipped with a three-phase 60-cycle generator furnishing 2,300 volts at 120 revolutions a minute. As complete electrification as possible is planned both underground and surface and if the hoisting is successful there will be no need for isolated steam plants, but all boilers can be concentrated at the compressor and generator stations. After the Winona generator capacity is reached King Philip will install a generator in its big power plant on the bank of the Sleeping river, where room has been left for it.

Heretofore Winona's future seemed confined to the south end of the property, tributary to No. 3 and No. 4 shafts, but recent developments at the sixth and tenth levels have been opening ground well charged with copper as they approached No. 2 shaft, which had been discontinued because of its unfavorable outlook. Winona's other openings continue of the same favorable character as heretofore.

King Philip's No. 1 shaft crocoseat at the sixth level shows a material improvement over that at the fifth level, which was itself good. At the sixth level the lode is 25 feet wide, with over 20 feet carrying excellent copper values.

While a mill for Winona and King Philip is not to be given early consideration, some thought has been given to a site. Measurements are to be made to determine the volume of water that is available on the watershed tributary to the Sleeping and Little Sleeping rivers, and if it is found sufficient a mill site at the mine may be selected. There is unlimited sand room, extending for nearly two miles on the company's property and not in the channel of any stream. It would be practicable to collect the water after the sand was deposited and from a central basin pump it back for use in the mill over and over, instead of letting it escape to Lake Superior.

Wyandot has revealed encouraging copper ground in the shaft which it is sinking 1200 feet east of the Winona lode. This is in a horizon believed to conform to the Battle lode. A few months ago a 300-foot shaft there was unwatered and has now reached 500 feet. The lode is irregular and the shaft sinking in a straight line, is usually in the hanging wall, but a "heave" in the formation brought the lode in the line of the shaft and for several days good copper ground was opened. The lode then sagged again and the shaft is now in the hanging wall.

Adventure has reached the solid

rock with the pipe which it is putting down for diamond drilling. It penetrated 425 feet of overburden, which is believed to be the record in the copper country. The entire distance was driven with a three inch double strength pipe. This is another unusual accomplishment, as larger pipes are generally used to start the hole and smaller ones are telescoped inside of them with depth.

ARTHUR L. CARNAHAN.

LEGAL NOTICE.

SUMMONS.

In the Justice Court, No. 28, Precinct of Cochise, Territory of Arizona.
C. M. McKean, Plaintiff, vs. Teodoro Rodriguez, Defendant.

Action brought in the Justice Court of No. 28, Precinct, in and for the county of Cochise, in the Territory of Arizona.

In the name of the Territory of Arizona:
To Teodoro Rodriguez, Defendant, greeting:
You are hereby summoned and required to appear in an action brought against you by the above-named plaintiff in the Justice Court of No. 28 Precinct, in and for the County of Cochise, in the Territory of Arizona, and answer to the complaint filed in said Justice Court, at Lowell, in said county, within five days exclusive of the day of service, after the service upon you of this summons, if served within this precinct; but if served without this precinct, but within the county, ten days; if served out of the county, fifteen days; in all other cases, twenty days, or judgment by default will be taken against you.

Given under my hand at Lowell, this 18th day of October, 1907.

R. S. GRIER,
Justice of the Peace of said Precinct.

NOTICE OF HEARING PETITION.

In the Probate Court of the County of Cochise, Territory of Arizona. In the matter of the estate of Thomas Devine, Deceased.

Notice is hereby given that Lucy E. Devine has filed in this court a petition praying for letters of administration of the above entitled estate, and that the same will be heard on Monday, the 17th day of February, A. D. 1908, at 10 o'clock, in the forenoon of said day, at the court room of said court, in Tombstone, County of Cochise, Territory of Arizona, and all persons interested in said estate are notified then and there to appear and show cause if any they have, why the prayer of the petitioner should not be granted.

Dated February 1st, 1908.

J. E. JAMES,
Clerk.

ORDINANCE NO. 123.

An Ordinance Annexing Contiguous Territory.

Be It Ordained by the Mayor and Common Council of the City of Bisbee, as follows:

Section 1. That a petition has been presented to the Common Council of said City, signed by the owners of more than one-half (in value) of the

property in the territory hereinafter described, which territory is contiguous to the duly incorporated City of Bisbee, Territory of Arizona, as shown by the last assessment of said property, and not embraced within the limits of said City of Bisbee, petitioning that the Common Council extend, enlarge and increase the corporate limits of the said City of Bisbee, so as to include the said contiguous territory:

Section 2. That the corporate limits of the said City of Bisbee be and the same are hereby extended, enlarged and increased by annexing thereto, the said contiguous territory, described as follows, to-wit:

Beginning at Corner No. 1, whence Bisbee Townsite Cor. No. 4, bears North 66 deg. 30 min. West, 850.00 feet, thence South 23 deg. 30 min. West, 700.00 feet to Corner No. 2, thence South 66 deg. 30 min. East, 1000.00 feet to Corner No. 3, thence North 23 deg. 30 min. East, 750.00 feet to Corner No. 4, thence North 66 deg. 30 min. West 1000.00 feet to Corner No. 1, the place of beginning, according to the map thereof made by J. S. McNeish, City Engineer, Feb. 1, 1908.

Section 3. That the territory so annexed shall be and become part of the Third Ward of said City of Bisbee, which adjoins the territory so annexed.

Section 4. That a copy of this Ordinance with an accurate map of the territory hereby annexed, duly certified by the Mayor of said City, be filed in the office of the County Recorder of Cochise County, being the county where the annexed territory is situated, and recorded therein.

Section 5. This Ordinance shall take effect and be in force from and after its passage and approval by the Mayor and posting and publication as required by law, and the filing and recording of a copy thereof, and of said map in the office of the County Recorder of Cochise County.

Passed and adopted by the Common Council the 4th day of February, 1908.

C. L. CAVEN,

Mayor.

Attest:
C. W. HICKS, City Clerk

Approved the 4th day of February, 1908

C. L. CAVEN,

Mayor.

NOTICE TO CREDITORS.

Estate of Edward Steiner, Deceased.
Notice is hereby given by the undersigned executrix of the last will and testament of Edward Steiner, deceased, to the creditors and all persons having claims against the said deceased, to exhibit them, with the necessary vouchers within four months after the first publication of this notice to the said executrix, at her residence on Oak street, Mason Hill, in the city of Bisbee, the same being the place for the transaction of business of said estate, in said county of Cochise.
MARY E. STEINER,
Executrix of the Last Will and Testament of Edward, Deceased.
Dated Bisbee, Arizona, this 10th day of January, 1908.

First Publication January 12, 1908.

A GENUINE CLOSING OUT SALE

OF

\$25,000 Worth of High Grade Groceries

We have decided to retire from the grocery business in Bisbee, and as our stock is too large to lump off to a single dealer, we are going to give our customers and the Bisbee people generally the benefit of prices on HIGH GRADE GROCERIES the like of which has never been experienced in this city.

BRONCO TABLE FRUIT— Per can 20c Per dozen \$2.50 Per Case \$4.75	BRONCO TABLE GRAPES— Per can 20c Per dozen \$2.50 Per Case \$4.75	FAVORITE KIDNEY BEANS— 2 cans for 25c Per dozen \$1.40 Per Case \$2.75	FAVORITE SUCCOTASH— 2 cans for 25c Per dozen \$1.40 Per Case \$2.75	B. L. CATSUP— Per pint 25c Per quart 50c	FROM 30 TO 65 PER CENT off on all kinds of Pickles— Sour and Sweet Pickles and Olives in Glass and Bulk.
BRONCO TABLE PEACHES— Per can 20c Per dozen \$2.35 Per case \$4.50	BRONCO TABLE Blackberries Per can 20c Per dozen \$2.50 Per Case \$4.75	FAVORITE WAX OR GREEN STRING BEANS— Per can 15c Per dozen \$1.60 Per Case \$3.00	FAVORITE SLICED or GRATED PINEAPPLE— Per can 25c	GAL. CATSUP in GAL. CANS— Per can 50c	HORSE RADISH SWEET RELISH DIAMOND RELISH INDIA RELISH L. & P. SAUCE PEPPER SAUCE PICKLED ONIONS MUSTARD
BRONCO TABLE PEARS— Per can 20c Per dozen \$2.50 Per Case \$4.75	BRONCO TABLE CHERRIES— Per can 25c Per dozen \$2.90 Per Case \$5.75	FAVORITE HOMINY, 3-lb cans 2 cans for 25c Per dozen \$1.40 Per Case \$2.75	FAVORITE RED CHERRIES— Per can 20c	GALLON WORCESTERSHIRE SAUCE—Per can 50c	ALL PIE FRUIT in gallon and 2 1-2 Gallon tins. ALL CANNED MEATS
BRONCO TABLE APRICOTS— Per can 20c Per dozen \$2.50 Per Case \$4.75	BRONCO TABLE Raspberries Per can 25c Per dozen \$2.90 Per Case \$5.75	FAVORITE PUMPKINS— 3-lb cans— Per can 15c Per dozen \$1.50 Per Case \$2.85	PRINCESS CORN— 3 cans for 50c Per dozen \$1.65 Per Case \$3.25	BISHOP'S PRESERVES IN GLASS—Jar 35c 3 Jars for \$1.00	BLUE POINT OYSTERS NEPTUNE OYSTERS LOBSTERS CODFISH BALLS KIPPERED HERRING BOILED MACKEREL TEAGARDEN SYRUP SARATOGA SYRUP ALL BULK TEAS And various other things.
BRONCO TABLE PLUMS— Per can 20c Per dozen \$2.50 Per Case \$4.75	BRONCO TABLE Strawberries Per can 25c Per dozen \$2.90 Per Case \$5.75	FAVORITE TOMATOES— 2 cans for 25c Per dozen \$1.50 Per Case \$2.75	PRINCESS PEAS— Per can 20c Per dozen \$2.25 Per Case \$4.50	BISHOP'S JAMS IN GLASS— Per Glass 25c	
	FAVORITE CORN— 2 cans for 25c Per dozen \$1.40 Per Case \$2.75		PRINCESS TABLE FRUIT— Per can 25c Per dozen \$3.00 Per Case \$5.90	BISHOP'S JELLY 20c	
				1-LB HONEY IN COMB 15c	
				3-LBS. STONE CROCK PRE- SERVES 70c	
				3-LBS STONE CROCK AP- PLE BUTTER 50c	

We only mention a few articles, but everything in the store goes at correspondingly low prices, as we are going out of business. An excellent opportunity to get a month's supply of groceries at a wonderful saving.
